

TRAFFIC ADVISORY

State Street/University Parkway Grade Separation

August 14, 2008

Upcoming Traffic Switch:

Due to the opening of the new State Street bridge, please be aware that the existing State Street route and rail crossing will soon close.

As the State Street/University Parkway grade separation project nears completion, traffic will be switched to the new State Street/University Parkway bridge crossing over Cajon Boulevard and the BNSF railroad tracks in late August. The current State Street route and rail crossing will be closed and fenced off to all vehicles and pedestrians the weekend before Labor Day (August 30-31).

Motorists Route Changes (see map on reverse):

- ⇒ Northbound traffic on Cajon Blvd. will access State Street and University Parkway by turning left onto Short Street.
- ⇒ Southbound traffic on Cajon Blvd. will access State Street and University Parkway by turning right onto Short Street
- ⇒ Northbound traffic on State Street will access the new bridge at the intersection with Short and Nolan Streets.
- ⇒ Southbound traffic on State Street will access the new bridge at the intersection with Hallmark Parkway.

Note: The existing traffic signal at Cajon Blvd. and the “old” State Street/University Parkway intersection will be removed.

Pedestrian and Bicycle Route Changes (see map on reverse):

- ⇒ All pedestrian and bicycle traffic will access the new bridge from Short and Nolan Streets to the south and Hallmark Parkway to the north.

Thank you for your patience during construction. Should you have any questions or concerns regarding the upcoming traffic switch, please contact us at (909) 875-6029, ext. 216.
